QBuild
CAD ERP INTEGRATION

CADLink & MBoM

For

FourthShift™ | infor VISUAL | Acumatica The Cloud ERP

Part 1

Dasha Sheina, Sr. Solutions Engineer

Agenda

- What is QBuild?
- Teamwork to Success
- What is CADLink?/Why CADLink?
- CADLink Demo
- Q&A – Tomorrows Session!

QBuild

What is QBuild

CAD ERP INTEGRATION

QBuild

QBuild

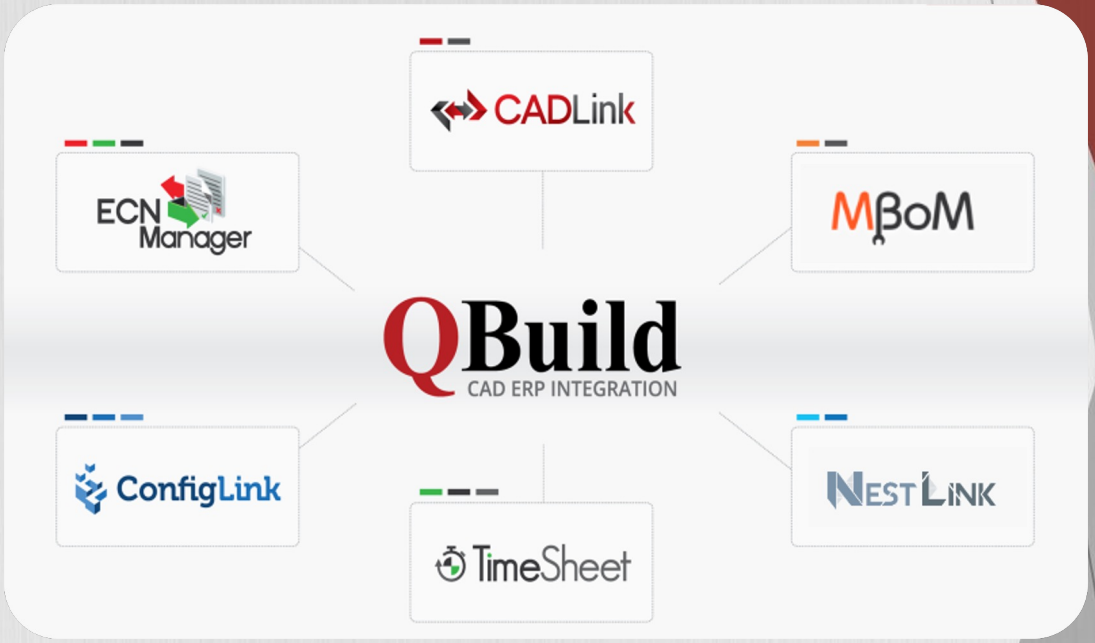
CAD ERP INTEGRATION

How do we do it?

QBuild

QBuild: Beyond CADLink

- Turn your CAD BOM into Manufacturing BOM
- Integrate your engineering change process with CADLink and ERP
- Synchronize material inventory and work order data with Nesting software and ERP
- Integrate your product configurator with your CAD to automatically create parametric configuration



What do QBuild do for Customers?

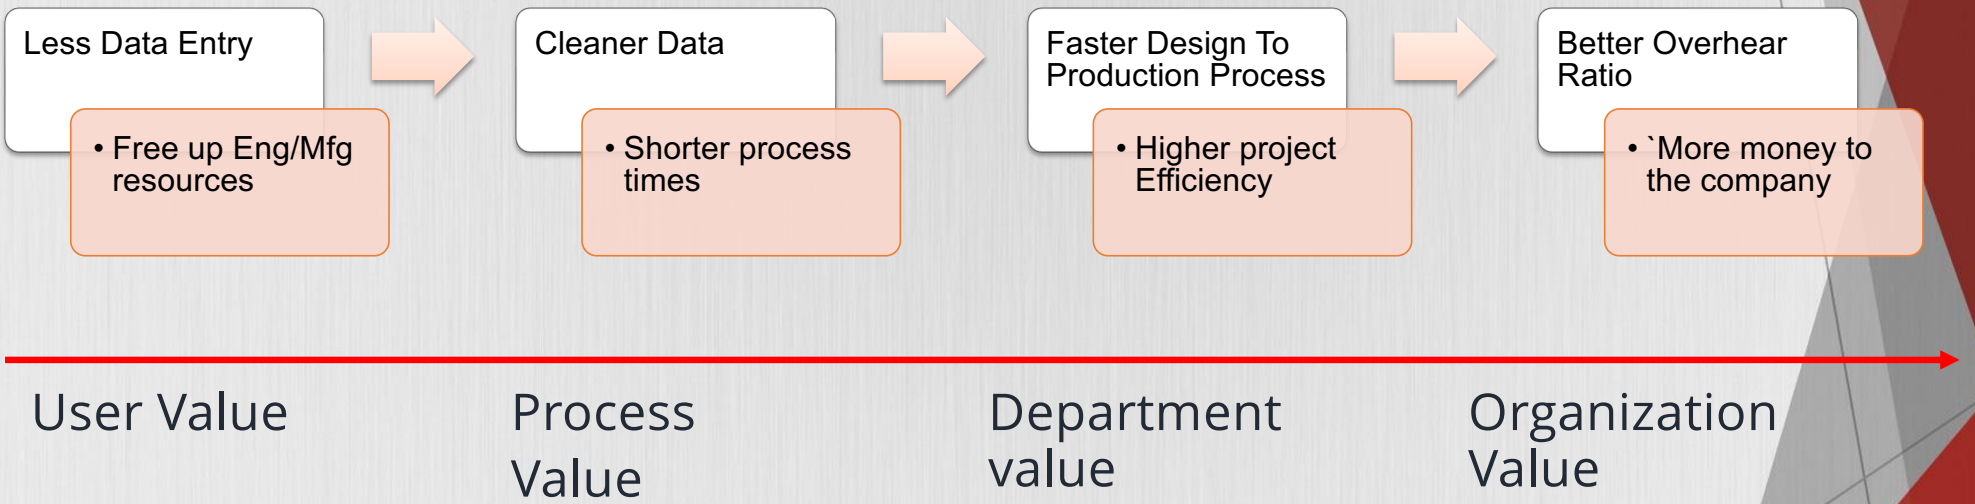
QBuild reduces Engineering costs by making Engineers more productive.

Benefits:

- Synchronize data between departments by enabling swift communication
- Let Engineers concentrate on the engineering work instead of data management
- Make life easier for Engineering and Manufacturing

QBuild

What does QBuild do for customers?



QBuild

What do we do?

CADLink began in 2002 as a simple linking program between AutoCAD and a BOM database.

Today, we have a growing list of CAD, PDM, and PLM integrations with Infor and Acumatica…

QBuild

Team Work to Success

QBuild

Teamwork to Success

Solution Partner

QBuild Products are certified by and sold through Infor/ICG.

QBuild

Success with Infor

- Solution Partner since 2015
- Over 350 Infor customers (100 new logos in the past year!)
- Sold on Infor paper for Fourth Shift, CSI/SyteLine, XA and VISUAL.

infor™ Solution Partner

QBui

Teamwork to Success

QBuild Products are certified by and sold through Infor/ICG.

QBuild

Success with Acumatica

- Solution Partner since 2019
- Over 10 Acumatica customers (3 new logos in the past year)
- Sold on Acumatica/ICG papers

QBui

Why CADLink

QBuild

ERP Challenges for Manufacturers

QBuild

ERP Challenges for Manufacturers

Product Development

- Long lead times to market
- Delayed change notifications across departments

QBuild

ERP Challenges for Manufacturers

Product Development

- Long lead times to market
- Delayed change notifications across departments

Product Quality

- Design intent lost in translation
- Production errors

QBuild

ERP Challenges for Manufacturers

Product Development

- Long lead times to market
- Delayed change notifications across departments

Engineering Resources

- Non-value added activities
- Reduced project/design capacity

Product Quality

- Design intent lost in translation
- Production errors

QBuild

ERP Challenges for Manufacturers

Product Development

- Long lead times to market
- Delayed change notifications across departments

Engineering Resources

- Non-value added activities
- Reduced project/design capacity

Product Quality

- Design intent lost in translation
- Production errors

Data Management

- Double or triple data-entry
- Downstream confusion due to inaccurate data

QBuild

What is CADLink

QBuild

What is CADLink?

Integrated directly with Fourth Shift, SyteLine, VISUAL, XA, M3 and LX

QBui

Benefits of CAD integration

- Reduce Manual Data Entry
- Reduce Data Entry Errors
- Eliminate ERP Clerical Work

QBuild

CADLink Demo

QBuild

CADLink Benefits

1. Reduce Costs

- Reduce non value-added engineering activities
- Double and triple data entries are eliminated
- Leave the software upkeep to us ☺

QBui

CADLink Benefits

1. Reduce Costs

- Reduce non value-added engineering activities
- Double and triple data entries are eliminated
- Leave the software upkeep to us ☺

2. Improve Accuracy

- Reduce scrap
- Improve purchasing accuracy
- Eliminate “wrong build” situations
- Improve on-time shipments
